Digital Kaam

Customer Section

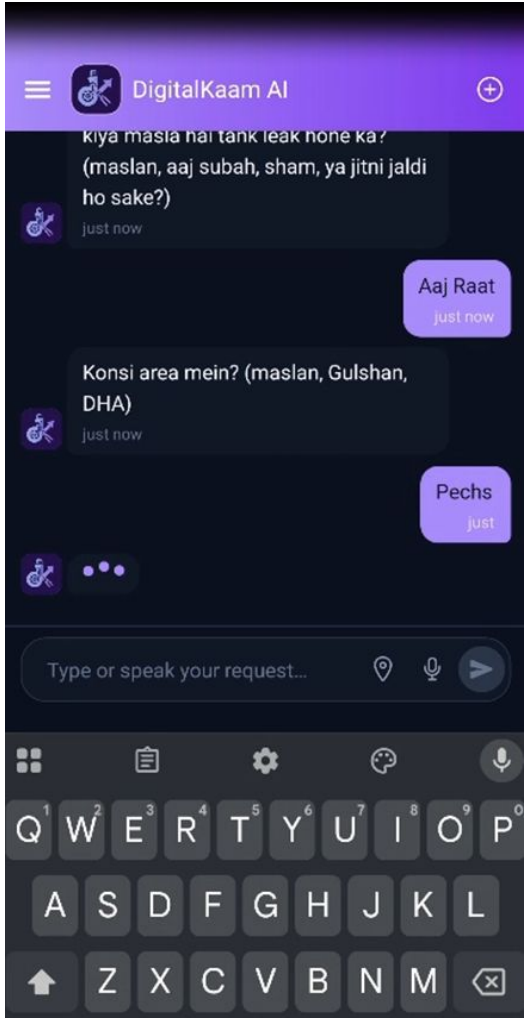

Login Screen

- You can login or create new account

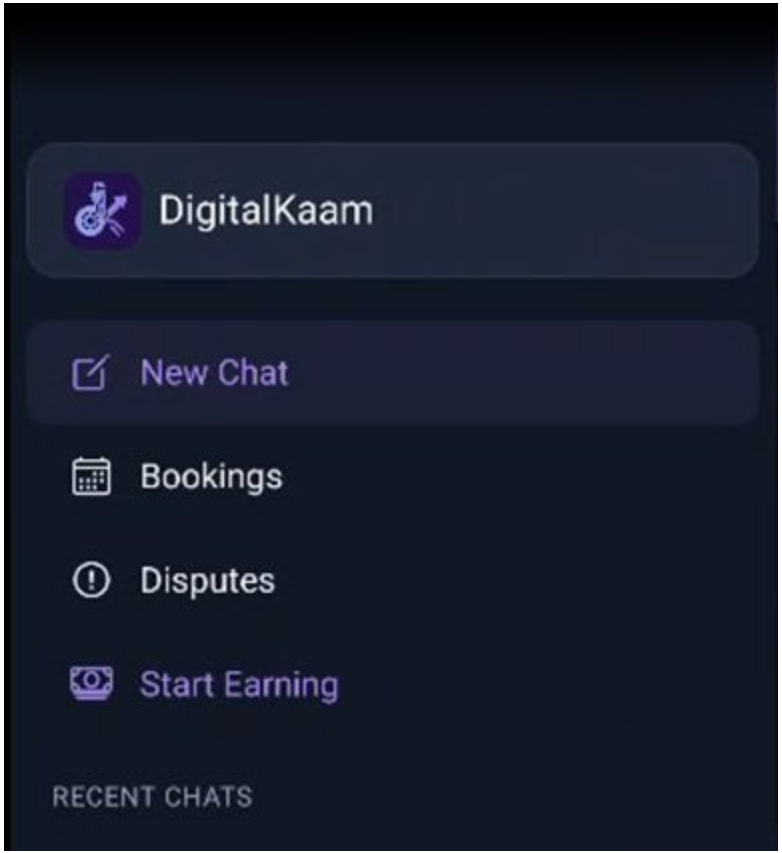

- Create an account.
- When you create an account, the account type is set to Customer by default. After logging in, you can change it to Provider, allowing you to switch between Customer and Provider.

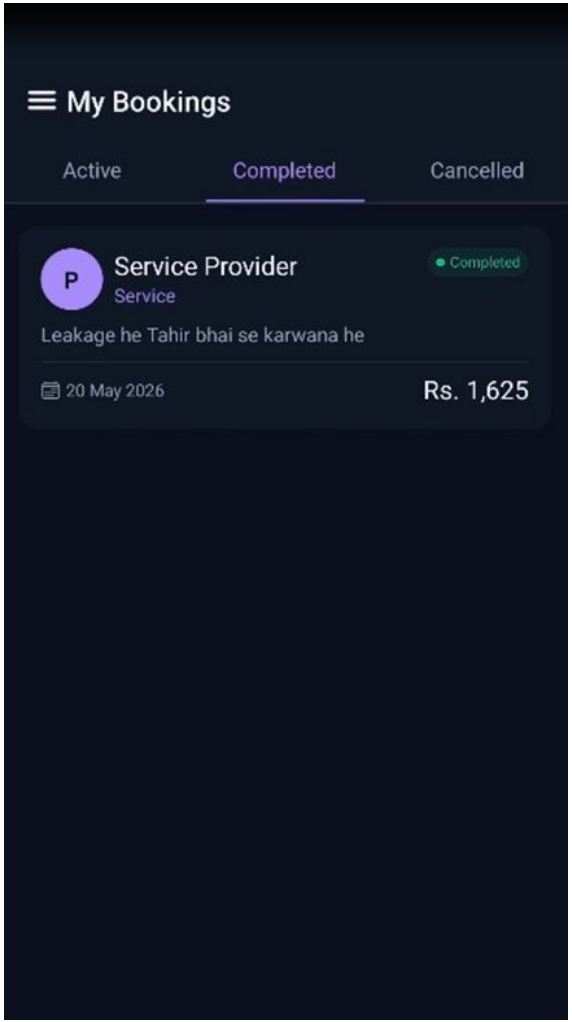

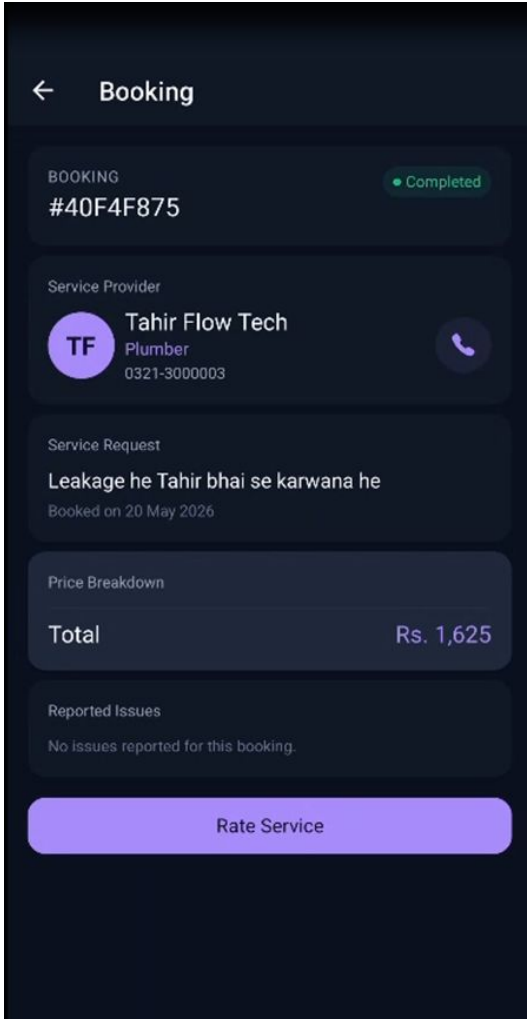

- You can chat with AI using Urdu, Roman Urdu, and English.
- When you request a service, it checks the confidence score to determine whether it matches your query. If the score is below 70%, it asks for confirmation.
- It finds providers based on distance, price, rating, timely arrival, and user preferences. Before confirmation, it shows you the estimated service price using the provider's hourly rate, visit fee, and platform fee.

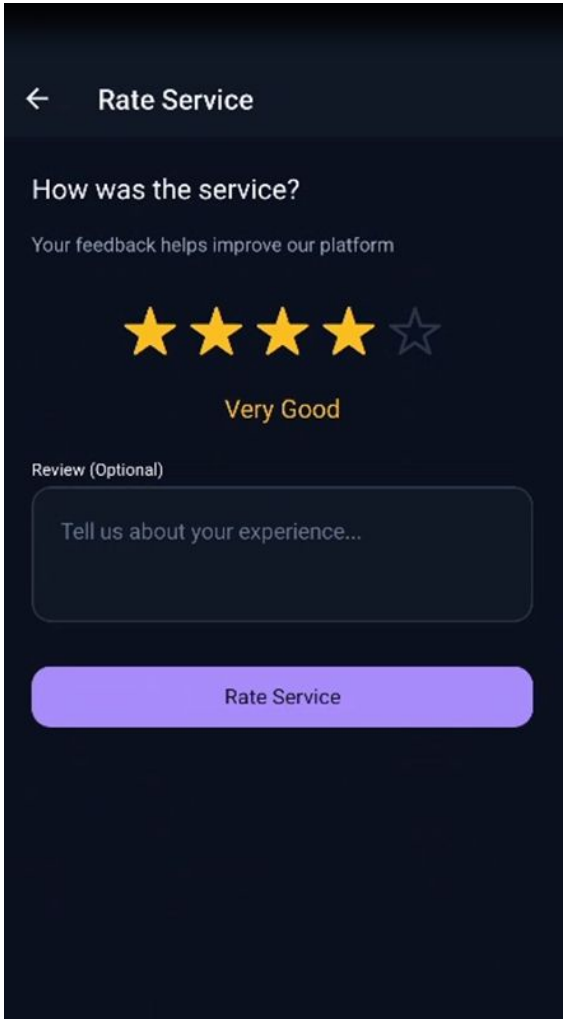

- This is the customer settings page. You can check your bookings, view disputes filed against providers, chat with AI, and click on **Start Earning** to become a provider.

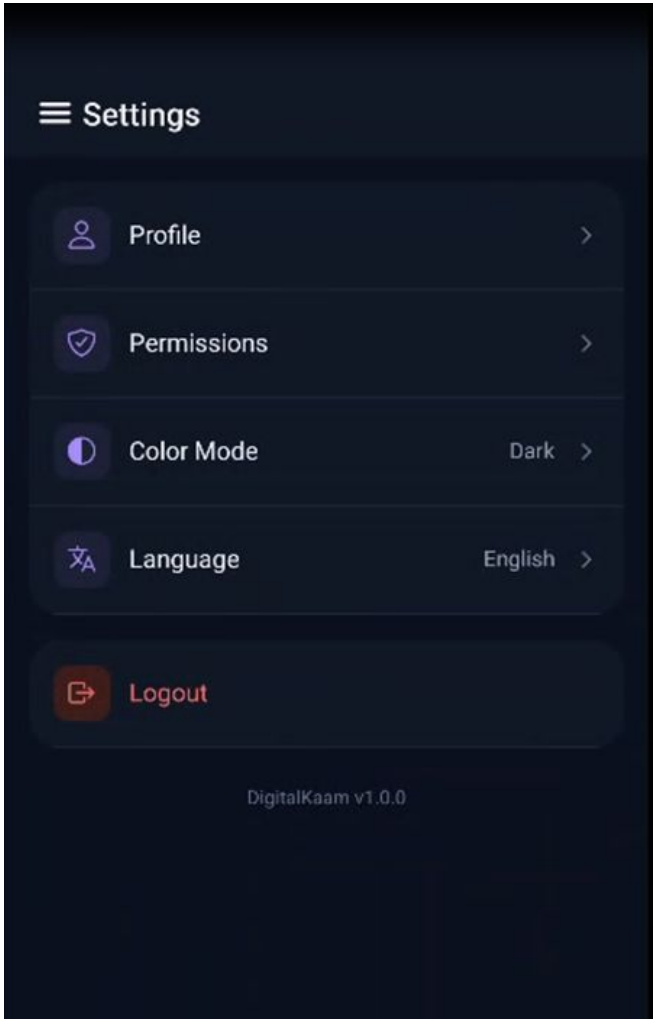

- You can check your active, completed, and cancelled bookings, as well as view their details.
- You can also rate completed services.

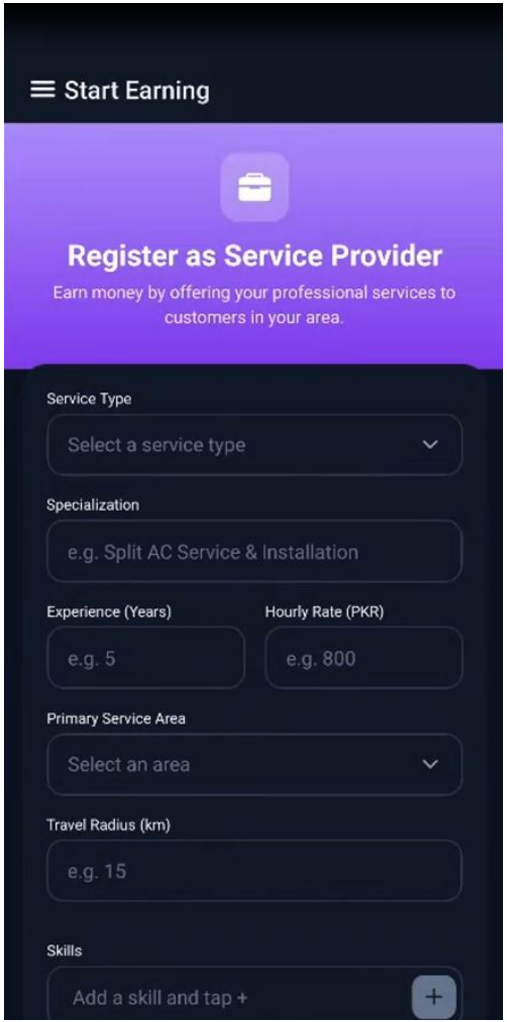

- Feedback Screen for customer

- You can switch between Dark Mode and Light Mode.
- You can change the language between Urdu and English.
- Profile Settings
- Permissions

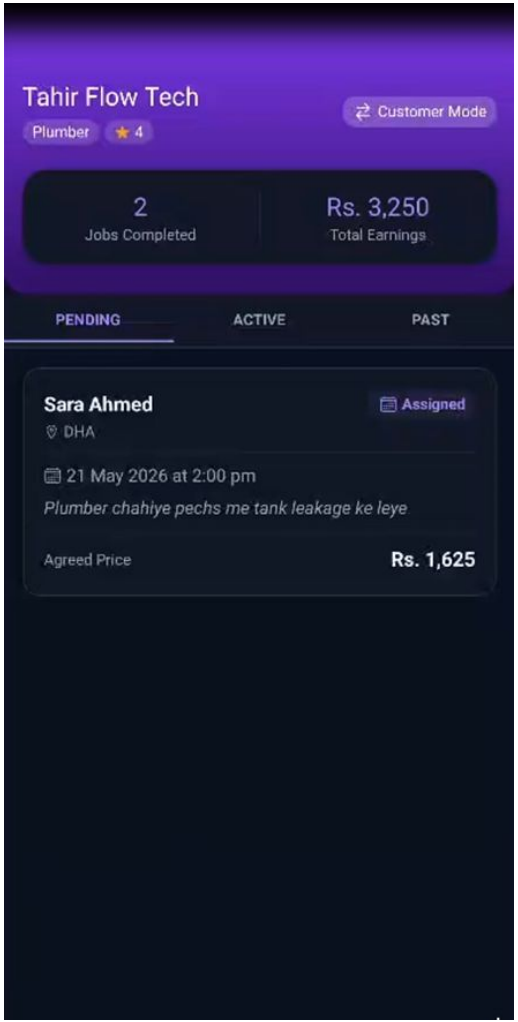

- This shows the details of a dispute filed by a customer against a provider.

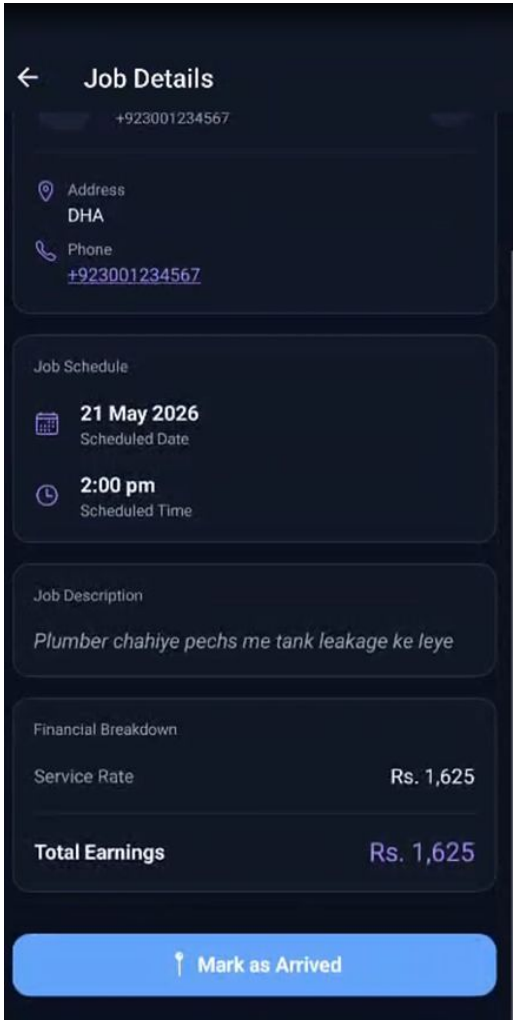

- This is the **Become a Provider** screen for customers.
-

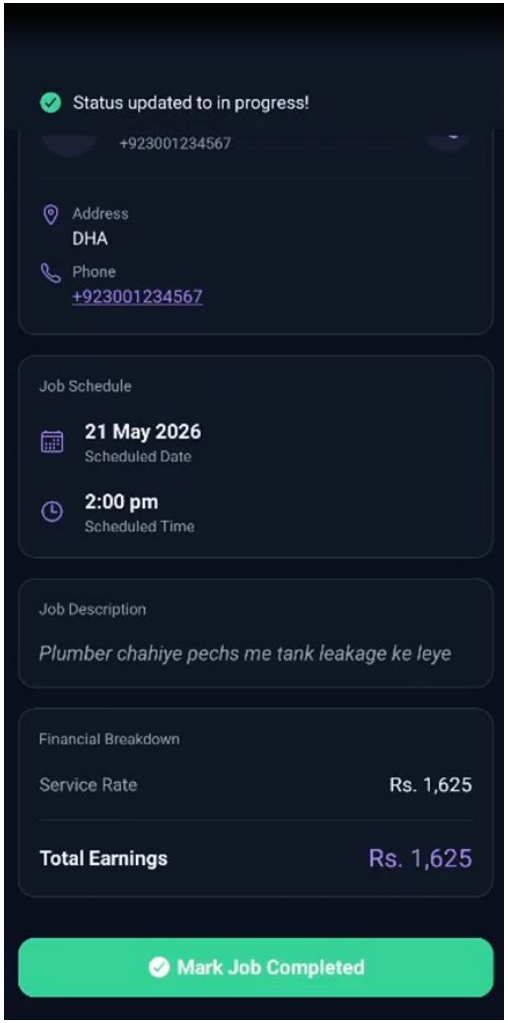

Provider Section Start

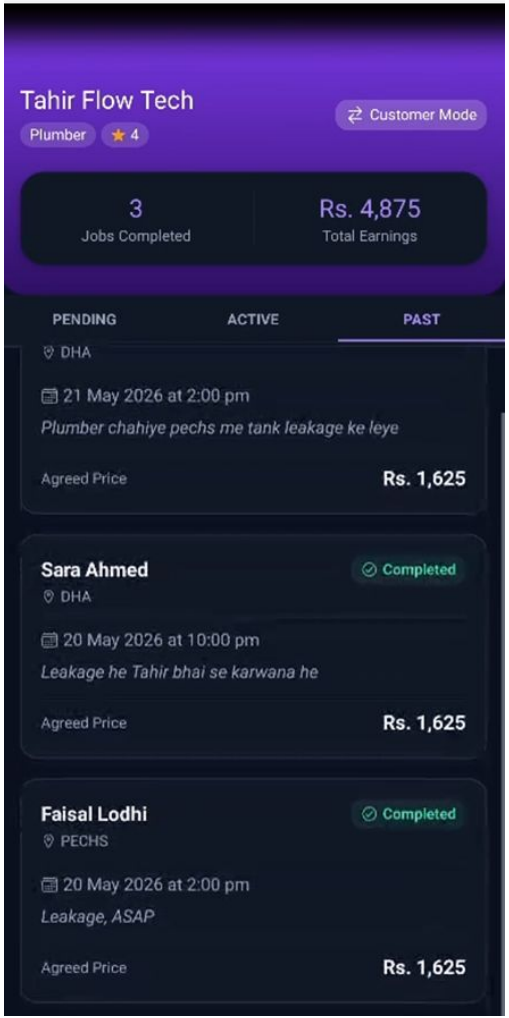

Provider dashboard

- Here the provider can view total earnings, completed jobs, pending jobs, and past jobs along with their details.

- Jobs and the complete workflow, from Arrived to Job Completed.

- Past jobs details

- The provider can view disputes that have been filed against them.

- Urdu language
